Potential profil

- Proven clinical experience in the field of neuropsychology allowing for academic clinical practice and integration into the professional network;
- Interest in clinical neuropsychology integrating different methods and clinical populations as well as a life-span approach;
- Research experience in the field of clinical neuropsychology, as evidenced by scientific publications and financed research grants;
- University teaching experience in the field of the position;
- The ability to lead research teams, to obtain research subsides and to manage academic training.
### JOB SPECIFICATION

#### Teaching and management (30%)

Depending on the activity rate specified above, the professor will have a series of teaching activities between 9 and 15 ECTS depending on the professorial level in the field of the position:

- Courses at the University Bachelor's degree level, at the Master's degree level in psychology and at the Master of Advanced Studies level;
- Responsibility for the training of the "Master of Advanced Studies" in clinical neuropsychology.

Supervision of clinical neuropsychology training.

Supervision or direction of University master's theses, diplomas and internships.

Continuous training:
- Participation in the organization and interventions in inter-university continuous training in clinical neuropsychology.

#### Research (40%)

- Development of research in the field of clinical neuropsychology;
- Submission of grant applications to the Swiss National Science Foundation or to other Swiss or foreign research foundations;
- Collaborations with colleagues from the Faculty of Psychology and Educational Sciences (FPSE), as well as with national and international research teams;
- Direction of PhD.

The incumbent will assume management activities in the Psychology Section, the Faculty of Psychology and Educational Sciences and at the University of Geneva levels. He/she will participate in the management and organisational tasks related to the specific field entrusted to him/her and will participate in the consultations of the FPSE Cité Pole (https://www.unige.ch/fapse/pole-cite/).

The professor must be prepared to perform a service function for the community that is part of the University's mission, this type of activity being ipso facto part of the position. The incumbent is expected to be part of the local network of health care institutions.
